About us

Since 1995 Qbik has developed capable & user friendly software specialising in Internet connectivity and security. Our products allow users to manage their Internet connections (WinGate), connect remote offices together (WinGate VPN), and combat malware (Kaspersky AV for WinGate).

Free 30 day trials

All our products are available for a free 30 day trial, and are unlocked with an encoded key. Whether you are purchasing, upgrading, or wish to trial our software, the downloaded software is the same.

Unlimited support

We provide unlimited free support to help you get the best out of our products, whether you are evaluating or have purchased our software.

WinGate

Our flagship advanced caching HTTP proxy, SOCKS server and multi-protocol proxy server, email server and internet gateway system for Windows.

Intercept, cache and scan web content.
Scan https traffic also, with https inspection.
Restrict and log user web access.
Solve headaches with legacy TLS versions
And a whole lot more....

New version: 9.4.1 (1 February 2020) FREE for 10 users

KASPERSKY AntiVirus
FOR WINGATE

Scan your WinGate traffic for malware using Kaspersky Labs highly respected scanning engine. Also scans web browsing for exploits.

Lumen
for WinGate

Lumen for WinGate is a web content classification plugin for WinGate. It allows administrators to set access policy based on the classification of a site, rather than having to set policy on a site-by-site basis.

Comenzamos el proceso de instalación del programa Wingate en nuestro servidor proxie

Accedemos desde la pantalla que pone localhost

Qbik License Activation

All Qbik products require activation.

To activate or deactivate a license, a request needs to be sent to our activation servers to validate your license. You can make a request online (if you have a connection), or off-line.

☒ Online (recommended)
A working internet connection is required.
If you need to initiate a connection to the Internet, please do so now.
☐ Use a proxy server to connect to the Internet

☐ Off-line
This involves generating a request file, which is submitted to our activation servers from another computer using an online web-based form.

Así es como nos mostraría Wingate una vez este correctamente instalado

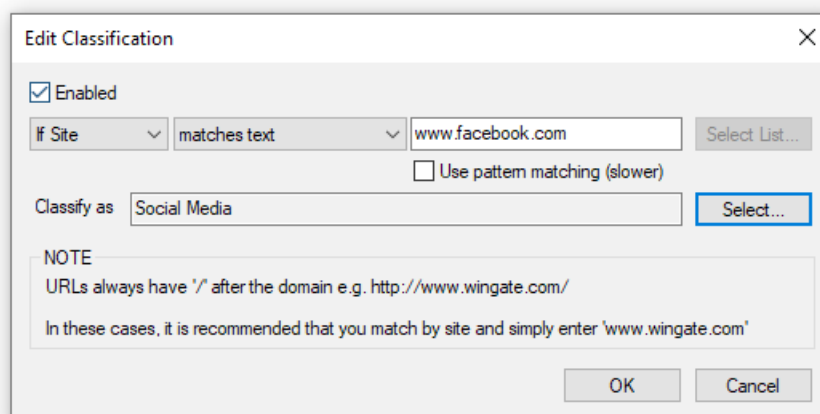

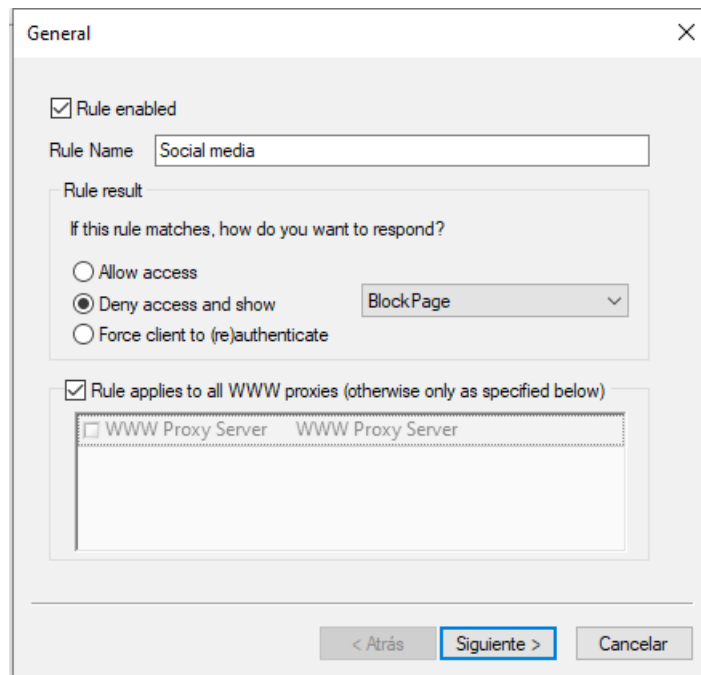

Tenemos que agregar DHCP Y DNS

Creamos la regla que impida que podamos acceder a las paginas web que hemos puesto

Y una vez que hemos hecho esto lo probamos poniendo en nuestro navegador la dirección IP de facebook
